REMEDIES OF BOY-**HOOD EFFECTIVE**

Days of "Lung Fever," When Temperature Was Unknown.

A friend from the country recalls his throat. the days when a boy came home at night strangely tired, and when mother looked at him curiously and said but little. Somehow she seemed rather tender, and came along and brushed the hair from his forehead and took his hand and held it as he would like to have her do today. But alas! The flowers have bloomed these 40 years above her head.

And he remembers how the family sat around for supper and how the rattle of the dishes made him feel sick and how he fell asleep and awoke in bed, screaming with a dream of falling from some great height or that the world and the moon came together gainst his will.

Somehow all of my memories of boyhood ills are associated with catnip, camphor, balm of gilead and pare- a use. Hot mustard plasters or cold,

KEEP THE GARDEN PRODUCING ALL THROUGH THE SEASON

Ground Should Be Kept Busy All the Time, Either by Companion Cropping, by Following One Crop With Another or by Successive Planting.

Middle States section are in the height of their glory, and the New England gardens are just getting well started. It seems to be a foregone conclusion on the part of most persons throughout the Southern States that southern gardens can be grown only in the spring and in the fall, with a few chance hardy crops during the win-

The farmers of the middle section plants his spring garden, then gets busy with farm crops, and very little further attention is given the garden, unless the work is done by the wo-men. In the New England States and parts of the northwest where the growing season is quite short only one crop of most vegetables can be grown. In the middle section, how-ever, two crops can often be grown on the same land, and more important still, a continuous supply of peas, beans, sweet corn, and a number of other vegetables can be had by making successive plantings.
Grow One Crop After Another

The garden is generally the richest spot of ground on the farm, and for before the first killing frost of autumn that reason should be expected to pro- may be expected. duce more than any other similar area. To get maximum production, however, it is necessary to keep the spring. This is due to the shortening land busy all the time. This can be of the days and the tendency of the done in two ways; first by companion cropping, and second, by following one crop with another or successive planting.

There are a number of crops that lend themselves to companion crop- you like them. ping. For example, where onion sets are planted in rows, say 18 inches between the rows, a row of radishes, spinach, or lettuce can be drilled between the rows of onions and be off the ground before the onions need the space. Spinach, radishes early beets, or turnips can be planted be-tween carrotts, parsnips, and salsify. A crop of snap beans can frequently be grown between the rows of tomatoes. Radish seeds may often be planted alongside a row of peas, the radishes being pulled and out of the way before the peas begin to climb the trellis or brush provided for their support or to spread over the ground. A little later in the season sweet corn or late cabbage can be planted be-tween the rows of early Irish potatoes and make considerable of a start before the Irish potatoes are dug.

In the extreme South a few crops that will withstand the heat should be planted for midsummer use. Swiss chard, while adapted to a temperate climate, does fairly well under southern conditions and continues to produce greens throughout the greater part of the summer. Bussella, of New Zealand spinach, is adapted for the ed period.

Bernard Lewis and family and Grover Bellou and family, of Ammons spent Sunday with W. H. Dutschke

and family. We have Sunday school every Sunday afternoon at 2:30. Everybody invited to attend.

OWNER OF A FLORIDA ORANGE GROVE IN KY. FOR HIS HEALTH.

Mr. S. G. Hall, of Fels Mare, Fla. is in Cloverport for the first time in eighteen years, visiting his step-fath-er, Mr. Janes Meador. Mr. Hall has been in ill health and his physicians advised him to spend the summer in another climate, so he will abide his time here, at Irvington with his son, Frank Hall and in Louisville with his

brother.

Mr. Hall is the owner of an orange grove in Fels Mare, and also superintends another grove of 240 acres owned by Northern men. Mr. Hall is a native of Cloverport, and says he is already feeling better from being at home and meeting with his relatives and old friends. His former home was the old Bates place, now owned by Pete Hinton.

Southern gardens begin to look tatoes, late snap beans, beets, or tur-

seedy about June 10, gardens in the nips. Early Irish potatoes may be Middle States section are in the height followed by turnips, late snap beans,

or by late sweet corn.

Fall gardens should in no case be overlooked, especially from the Middle States southward. Plantings of practically all the early spring vegetables may be made from July to September, according to locality, and be brought to maturity before early autumn frosts. By proper attention to the garden, fresh vegetables may be had through a period of about 10 months of the year in the extreme South and for about 7 months in the middle section. The season for the New England and northwestern sections is necessarily much more limited but even here the efficiency of a garden can be greatly increased by a careful study and attention to the matter of companion cropping and successive plantings of certain vege-

Late cabbage seed should be sown about June 1, in most sections and the plants set in the garden June 20 to July 5. The last planting of sweet corn should be made about 80 days

Most crops mature in a shorter period in the late summer than in the of the days and the tendency of the plant to "hurry up" to produce its seed before winter overtakes it. It pays to take a chance on late plantings of beets, carrots, lettuce, spinach, snap beans, sweet corn and turnips if

As a rule early or quick maturing varieties are best for late planting. This does not apply, however to Golden Baniam coin which does best in the pring. Ev rgreen or Mammoth

Evergreen corn are considered best for late planting.

A Few Trickr Worth Learning
Plenty of fertility in the soil and a little commercial fertilizer will help greatly to push the late crops to maturity. In some sections a little nitrate of soda is used as a top dress-

be a wizard to practice these tricks but just a good, common sense gar-dner. One of the best of these is the use of a board laid over the row of seed for a few days after planting to start during dry weather. Another is to flood the furrow with water and allow it to soak into the soil before dropping the seeds, then cover with dry earth. Slightly packing or firm-ing the dry soil over the seeds will help to bring the moisture to the surface and make the seeds grow. Garproduction of greens during the heat- den tricks are easy to perform-try a few and see the results in the form The middle section, early peas may of fresh vegetables for the table—it be followed by late cabbage, late po-, means better living.

LIVE IN FLORIDA

Will Transfer Citizenship from Lincoln; Admits For First Time He Voted for Cox.

New York City.-William Jennings Bryan announced in this city last week that he had changed his legal residence from Lincoln, Neb., to Florida, where he has had a winter home for eight years. His friends believe this marks a new era in the political life of the man who three times has been the candidate of the Democratic party for President, but whose political influence in his home State has been waning.

It is Mr. Bryan's intention to take an active part in shaping the political affairs of Florida. In conversation with a friend he referred to the fact that the South always had been particularly bird to be a particular than the south always had been particularly bird to be a particular to the south always had been particularly bird to be a particular t cularly kind to him politically. His friends say he might stand for the United States Senate in 1923 if succession to Senator Park Tremmell. Mr. Bryan said he had consulted

no one outside the immediate members of his family, and gave out the following statement: "Mrs. Bryan's health is such that

it is necessary for us to live in the South, and, having tested Miami's climate for eight years, we have chosen that city for our permanent home. For some time I have been politically speaking, in a state of suspended animation, living in Florida but voting in

Nebraska. Being as much interests as ever in the problems of government and desiring to make my romaining years as valuable to my country as possible. I have decided to transfer my critizenship to Florida

transfer my citizenship to Florida, and thus make my actual residence my legal residence also."

Mr. Bryan said he would sell his property in Nebraska, but The Commoner, of which his brother, Charlet H. Bryan, is editor, will continue to be published there.

"I am 61 years old," said Mr. Bryan, and should have from ten to fifteen years more of useful life, Although I devote much time to reli-

though I devote much time to religious work, I think it is along government lines that I can be of the greatest help. Not being in Nebraska much of the time, I could not keep in touch there. And, although living in Florida I could take no active part in politics because I was not a legal resident. Why, I had to travel 2,000 miles to vote for Cox last Nevem-

And, incidentally that was the first time Mr. Bryan has ever acknowledged he voted for Cox. At the time it was reported he would vote for Harding.

RESIDENTS MAY BUY TANK OF STREET OIL

Many Enthusiastic To Have All of Cloverport's Streets Oiled.

There is a possibility of subscrip-tions being raised to buy a tank of street oil to use on practically all of the streets of Cloverport. Mr. O. T. Odewalt, who was the instigator for securing subscriptions and oiling Main street, was so successful in his undertaking that he has been urged by more of the citizens who live off of Main street to continue soliciting money and get a tank of oil. Mr. Odewalt states that he has nearly half enough funds to buy a tank of street

The tank holds 8,500 gallons of oil Residents who have not had their streets oiled are enthusiastic in seeing that the funds are raised so that they too may enoy a summer without dust

ALBERT HORSLEY'S 64TH BIRTHDAY HONORES

Stephensport, June 7. (Special)— The 64th birthday anniversary of Mr. Albert Horsley, of Stephensport, was nitrate of soda is used as a top dressing to hurry the plants along.

There are a great many little tricks that should be learned and practised by the gardner. It is not necessary to be a princed to the property of Stephensport, was honored on Sunday, June 5, with a big dinner and his children participating of it with him. Mr. Horsley has been married for 36 years and his good wife prepared 32 birthday dinners for him.

The children present at the cele-bration were: Mr. and Mrs. E. D. Sag and family, of Stephensport; Mrs. H. B. Tomer and children, of Hollohold the moisture and make the seeds way, O., Mr. and Mrs. Loe Horsley and baby, of Stephensport, Mr. and Mrs. Owen Horsley, Harmon Horsley. With the children were several friends who enjoyed the day too. Mrs. Tomer and children will remain with her parents for a longer visit.
